### Boundary element methods

Doublett Western Western	
Thermal stress analysis of axisymmetric bodies via the boundary element method, M.B. Chopra and G.F. Dargush	(1-2) 53- 71
Collocation method	
B-spline finite element studies of the non-linear Schrödinger equation, L.R.T. Gardner, G.A. Gardner, S.I. Zaki and Z. El Sahrawi	(3-4) 303-318
Coupled problems	
A finite element analysis of freeze-drying of a coffee sample, W.J. Ferguson, R.W. Lewis and L. Tömösy	(3-4) 341-352
Dynamics	
Explicit multi-time step integration for first and second order finite element semidiscretizations, T. Belytschko and Y.Y. Lu	(3-4) 353-383
Elasticity	
Complementary energy method for cylindrical shells using second order stress functions, E. Bertóti	(1-2) 147-163
Finite element and matrix methods	
The influence of the degree of constraint on the residual stress of the machined workpiece, Z.C. Lin, Y.Y. Lin and C.R. Liu	(1-2) 37- 52
Shape and non-shape structural sensitivity analysis for problems with any material and kinematic non-linearity, M. Kleiber  Computation of incompressible flows with implicit finite element	(1-2) 73- 97
implementations on the Connection Machine, M. Behr, A. Johnson, J. Kennedy, S. Mittal and T. Tezduyar	(1-2) 99-118
Mapped transient infinite elements for heat transfer problems in infinite media, C. Zhao and S. Valliappan	(1-2) 119-131
Complementary energy method for cylindrical shells using second order stress functions, E. Bertóti	(1-2) 147-163
Object-oriented finite element programming: III. An efficient implementation in C++, Y. Dubois-Pèlerin and T. Zimmermann	(1-2) 165-183
A variational finite element method for the two-dimensional Stokes problem, M. Souli	(3-4) 223-236
Combining recursive spatial decompositions and domain Delaunay tetrahedrizations for meshing arbitrarily shaped curved solid models, N.	(3-4) 223-230
Sapidis and R. Perucchio	(3-4) 281-302

<sup>\*</sup> The issue number is given in front of the page numbers.

B-spline finite element studies of the non-linear Schrödinger equation, L.R.T. Gardner, G.A. Gardner, S.I. Zaki and Z. El Sahrawi On a stress resultant geometrically exact shell model. Part VII: Shell	(3-4) 303-318
intersections with 5/6-DOF finite element formulations, J.C. Simo A finite element analysis of freeze-drying of a coffee sample, W.J. Ferguson,	(3-4) 319-339
R.W. Lewis and L. Tömösy  Explicit multi-time step integration for first and second order finite element	(3-4) 341-352
semidiscretizations, T. Belytschko and Y.Y. Lu	(3-4) 353-383
Fluid mechanics	
Computation of incompressible flows with implicit finite element implementations on the Connection Machine, M. Behr, A. Johnson, J. Kennedy, S. Mittal and T. Tezduyar	(1-2) 99-118
Heat and diffusion	
Mapped transient infinite elements for heat transfer problems in infinite media, C. Zhao and S. Valliappan Combining recursive spatial decompositions and domain Delaunay	(1-2) 119-131
tetrahedrizations for meshing arbitrarily shaped curved solid models, N. Sapidis and R. Perucchio  A finite element analysis of freeze-drying of a coffee sample, W.J. Ferguson,	(3-4) 281-302
R.W. Lewis and L. Tömösy	(3-4) 341-352
Modern computer architecture	
A parallel multigrid method for history-dependent elastoplasticity computations, S. Kacou and I.D. Parsons  Computation of incompressible flows with implicit finite element implementations on the Connection Machine, M. Behr, A. Johnson, J. Kennedy, S. Mittal and T. Tezduyar	(1-2) 1- 21 (1-2) 99-118
Nonlinear mechanics	
Shape and non-shape structural sensitivity analysis for problems with any material and kinematic non-linearity, M. Kleiber Algorithmic symmetrization of Coulomb frictional problems using augmented	(1-2) 73- 97
Lagrangians, T.A. Laursen and J.C. Simo  Postbuckling behavior and imperfection sensitivity of elastic structures by the	(1-2) 133-146
Lyapunov-Schmidt-Koiter approach, R. Peek and M. Kheyrkhahan	(3-4) 261-279
Numerical solution procedures	
Dynamic response sensitivity of inelastic structures, Y. Zhang and A. Der Kiureghian	(1-2) 23- 36
Mapped transient infinite elements for heat transfer problems in infinite media, C. Zhao and S. Valliappan Finite element method for one-dimensional and two-dimensional time dependent	(1-2) 119-131
problems with B-splines, K.N.S. Kasi Viswanadham and S.R. Koneru Combining recursive spatial decompositions and domain Delaunay tetrahedrizations for meshing arbitrarily shaped curved solid models, N.	(3-4) 201-222
Sapidis and R. Perucchio	(3-4) 281-302

Explicit multi-time step integration for first and second order finite element semidiscretizations, T. Belytschko and Y.Y. Lu	(3-4) 353-383
Optimization	
Dynamic response sensitivity of inelastic structures, Y. Zhang and A. Der Kiureghian  Shape derivative of discretized problems, M. Souli and J.P. Zolesio  Shape design sensitivity analysis of viscoplastic structures, T.H. Lee, J.S. Arora and V. Kumar	(1-2) 23- 36 (3-4) 187-199 (3-4) 237-259
Optimization and design of structures	
Shape and non-shape structural sensitivity analysis for problems with any material and kinematic non-linearity, M. Kleiber	(1-2) 73- 97
Phase changes	
A finite element analysis of freeze-drying of a coffee sample, W.J. Ferguson, R.W. Lewis and L. Tömösy	(3-4) 341-352
Plasticity	
A parallel multigrid method for history-dependent elastoplasticity computations, S. Kacou and I.D. Parsons  Dynamic response sensitivity of inelastic structures, Y. Zhang and	(1-2) 1- 21
A. Der Kiureghian  The influence of the degree of constraint on the residual stress of the machined workpiece, Z.C. Lin, Y.Y. Lin and C.R. Liu	(1-2) 23- 36 (1-2) 37- 52
Shells and plates	
Complementary energy method for cylindrical shells using second order stress functions, E. Bertóti  Postbuckling behavior and imperfection sensitivity of elastic structures by the Lyapunov-Schmidt-Koiter approach, R. Peek and M. Kheyrkhahan  On a stress resultant geometrically exact shell model. Part VII: Shell intersections with 5/6-DOF finite element formulations, J.C. Simo	(1-2) 147-163 (3-4) 261-279 (3-4) 319-339
Singularity methods	
Object-oriented finite element programming: III. An efficient implementation in C++, Y. Dubois-Pèlerin and T. Zimmermann	(1-2) 165-183
Solution of differential equations	
Finite element method for one-dimensional and two-dimensional time dependent problems with B-splines, K.N.S. Kasi Viswanadham and S.R. Koneru	(3-4) 201-222
Solutions of ordinary and partial differential equations	
Finite element method for one-dimensional and two-dimensional time dependent problems with B-splines, K.N.S. Kasi Viswanadham and S.R. Koneru	(3-4) 201-222

### Spline approximation

B-spline finite element studies of the non-linear Schrödinger equation, L.R.T.
Gardner, G.A. Gardner, S.I. Zaki and Z. El Sahrawi (3-4) 303-318

### Stability in structural mechanics

Postbuckling behavior and imperfection sensitivity of elastic structures by the Lyapunov–Schmidt–Koiter approach, R. Peek and M. Khevrkhahan (3–4) 261–279

#### Structural mechanics

- The influence of the degree of constraint on the residual stress of the machined workpiece, Z.C. Lin, Y.Y. Lin and C.R. Liu (1-2) 37-52
- Thermal stress analysis of axisymmetric bodies via the boundary element method, M.B. Chopra and G.F. Dargush (1-2) 53-71
- Shape and non-shape structural sensitivity analysis for problems with any material and kinematic non-linearity, M. Kleiber (1-2) 73-97
- Algorithmic symmetrization of Coulomb frictional problems using augmented Lagrangians, T.A. Laursen and J.C. Simo (1-2) 133-146
- Shape design sensitivity analysis of viscoplastic structures, T.H. Lee, J.S. Arora and V. Kumar (3-4) 237-259

## Thermal effects and thermal dynamics

- Thermal stress analysis of axisymmetric bodies via the boundary element method, M.B. Chopra and G.F. Dargush (1-2) 53-71
- A finite element analysis of freeze-drying of a coffee sample, W.J. Ferguson, R.W. Lewis and L. Tömösy (3-4) 341-352

## Transport phenomena

A finite element analysis of freeze-drying of a coffee sample, W.J. Ferguson, R.W. Lewis and L. Tömösy (3-4) 341-352

## Viscoelastic and viscoplastic media

Shape design sensitivity analysis of viscoplastic structures, T.H. Lee, J.S. Arora and V. Kumar (3-4) 237-259

#### Wave motion

B-spline finite element studies of the non-linear Schrödinger equation, L.R.T.
Gardner, G.A. Gardner, S.I. Zaki and Z. El Sahrawi (3-4) 303-318
